

GRAND AVENUE SOFTWARE
solutions for collaborative intelligence

Customer Profile: Angel Medical Systems, Inc.

“Grand Avenue has provided a solution that reduces our document control administrative burden, and has improved the quality of reviews. This has resulted in a significant reduction in administrative time and the volumes of paper that we were generating. Reduced cost of materials and improved accuracy of our documentation has easily offset the cost of the software. I look forward to continuing our partnership with the great people at Grand Avenue Software.”

Business Summary

Angel Medical Systems, Inc. is developing implantable cardiac monitoring systems. Angel Medical is currently in the first generation design phase of the product life cycle.

Quality System Goals

- Automate quality system processes and reduce the administrative overhead of existing paper based systems.
- Utilize tools that are compliant with 21 CFR Part 820 and Part 11 out of the box (no administrative workarounds) and have minimal system setup / administration requirements.
- Deploy an integrated, scalable quality and compliance system that can easily, efficiently and economically grow with the company in the future.

Solution

- Angel Medical Systems is leveraging the automated quality solution from Grand Avenue Software.
