

**GRAND AVENUE SOFTWARE**  
solutions for quality compliance

## Customer Profile: Biorep Technologies, Inc.

### Business Summary

Biorep Technologies is a full-service ISO 13485-certified and FDA-compliant product development company with over 17 years of experience providing complete development services for medical and life sciences companies. Biorep specializes in working with their client's to discover new product opportunities, solve complex product problems, and create intellectual property. Biorep successfully works to expand and protect their client's value in the market through product and technology innovation. Biorep is located in Miami, Florida.

### Quality System Goals

- Implement efficient and consistent processes for important quality system records.
- Allow authorized people to access the system from remote locations.
- Meet compliance requirements for ISO 13485:2003 and 21 CFR / Part 11.

### Solution

- Biorep Technologies implemented the Grand Avenue software system in a customer-site deployment.

### Business Results

The Grand Avenue system has helped Biorep realize many of their quality system goals including:

- The system was easy to install initially and is easy to operate on a day to day basis.
- Biorep has achieved ISO 13484 and 21 CFR / Part 11 compliance.
- Quality processes are structured and traceable.
- Quality records are easily located while anywhere in-process or when completed.
- Users can easily access the system remotely.
