

GRAND AVENUE SOFTWARE
solutions for quality compliance

Customer Profile: ENTrigue® Surgical, Inc.

Business Summary

ENTrigue® Surgical, a privately held medical device company based in San Antonio, Texas, delivers innovative and practical Ear/Nose/Throat (ENT) surgical solutions. Instruments from ENTrigue Surgical enhance surgical access for increased functionality and precision. ENTrigue Surgical has developed a new class of clinically proven bioabsorbable implants designed to simplify surgical procedures and improve healing. The company currently has products available in the market as well as many innovative products and technologies in various stages of research and development.

Quality System Goals

- Align to ISO 13485 and 21 CFR / Part 11 compliance requirements.
- Achieve compliance per the required regulations in a cost effective manner.
- Implement an efficient automated quality system that can easily grow with the company and support future company initiatives.
- Improve the efficiency and shorten the cycle times of important quality system processes.

Solution

- ENTrigue Surgical is leveraging the automated quality solution from Grand Avenue Software.

Business Results

- Compliance has been achieved.
- The quality system in place will seamlessly support the ongoing growth, evolution, and maturation of the organization.
